

CS-600-305 K Span machine

Main Technical Specification of K Span machine, Automatic Building Machine:

Size: 9000mm × 2250mm × 2300mm

Total Weight: about 13000KG

Main Motor Power: 16.5KW forming power is 5.5kw

Bending power is 4.0kw

Cutting power is 4.0kw

Conical power is 3.0kw

Working Speed: Straight sheet: 15m/min

Arch sheet: 13m/min

Sewing: 6m/min

Material of rollers: 45# steel, quenched HRC 58-62

Material of roller shafts: 45# steel, adjusted

Material of cutting blade: Cr12 steel (Taiwan Airline Technique)

Controlling system: PLC

Step of rollers: 13 steps

Feeding Width: 600mm

Effective Width: 305mm

The depth of the groove: 140mm

Thickness of the coil: 0.6-1.5mm

Operating factor of the panel: 51%

Proper span: ≤24m

K Span machine or Arch Roof Forming Machine is a type of arch sheet forming machine. It is mainly comprised of decoiler, forming unit, hydraulic mould cutting device, PLC control system, hydraulic system and unloading rack. Since its parts are mounted on a mobile pedestal, it is suitable for site working.

Changsheng is a professional Arch Roof Forming Machine manufacturer in China. We can provide Arch Roof Forming Machines of various specifications for you to choose from. Additionally, we also provide Ultimate Building Machine k span roll forming machines, PU sandwich panel machines etc. Due to their reliable quality and reasonable prices, our products are widely used in many countries, such as Germany, the Netherlands, India, Indonesia, Iraq, Afghanistan, and more.

With Changsheng steel construction machines, you can begin your construction project immediately!
